There are so many picky details that could be addressed, but here is a single slide (as requested) offering some important big picture messages from our perspective. We can tweak/revise this as needed. I never saw comments from TCEQ on the draft FS, but those could be very important in comparison. I would also like to see the Attachments that came with Harris County's comments.

We'll see what the weather holds in terms of the morning commute.

Thanks!

Phil

Phil – have something for the slide? The briefings are on Monday.

Thanks,

Gary Miller
